

This little bump out is part of section 4. Use it to separate section 3 from section 4.

This little bump out is part of section 1. Use it to separate section 1 from section 2.

SL/LD Route

The SL/LD route includes the the loading dock area between SL and LD.

Section 5 is part of LD and includes the loading dock area on the east side of the building complex.

Use the greenhouse on the roof to demarcate section 5.

Section 5 has an east side and a west side (but no north or south).

There are some structures here you'll need to weave around to inspect the full building perimeter.

Congratulations. You have been assigned to what is probably the most complicated of the six routes. If you have any difficulties, please let me know.

There is landscaping in these areas (shrubs, etc.) that may cause some problems. Inspect it as well as you can without destroying anything.
